#### Cheetah Exhibit

New Exhibit! The Brevard Zoo will open a new exhibit featuring three female cheetahs—Basil, Pepper, and Sasha. The new exhibit will be located in-between kayak beach and the rhino yard in Expedition Africa. All three cheetahs come from White Oak Conservation Center in Yulee, Florida. Basil and Pepper were born November 8, 2008 and Sasha was born January 6, 1996. Guests will be able to look down on the cheetahs from a platform viewing area, much like the experience when viewing the rhinos. Down below the platform, children will find a small, interactive play area. The area is a maze where children must “think like a cheetah” in order to get through the maze.
